

Anthemis arvensis, 1990 -2023, at least 6 fig grid ref**Best to Search: July - September (needs seeds)**

Yellow highlighting is for sites I favour visiting first

Site Name	Gridref	Date	Comment
North of Littleton	SU4633	26-May-11	Headland at N end of field S of B3420 roundabout SU462336. Identity confirmed 23.vi.11 when achenes developed
West Stoke Farm	SU4737	28-May-11	Large clump in corner of field, SU4758 3798, voucher retained.
Magdalen Hill, North Down	SU507293	16-Aug-05	Specimen a small piece from large plant at SU5072 2935. Another plant seen nearby at SU5066 2922. [Habitat since changed dramatically to a meadow]
Long Sutton, Vinney Plantation	SU737454	08-Jul-90	Field margin on south side of Vinney Plantation with plentiful Kickxia spp.
Long Sutton, Stapley Down	SU743481	08-Jul-90	Several plants on field margins on both sides of lane. Specimen confirmed.

I have omitted some earlier records, or duplicates, with the same grid reference.

Now much confused with the very similar looking, but alien, *Cotula* (*Anthemis*) *austriaca* that farmers sow as "wildflowers".

From the description the site north of Littleton must be at SU462335 (not SU462336). Access possibly from laybe beside B3420 at SU4623 3347.

Possibly parking at Vinney Copse SU7362 4547.

Possibly parking at Stapley Down at SU7431 4813.
