

Website Threatened Plant records in VC12.xlsx

**Genista anglica, 1990-2023, at least 6 fig grid ref**

**Best to Search: May - mid June**

Yellow highlighting is for sites I favour visiting first

Site Name	Gridref	Date	Comment
Bransbury Common	SU413419	10-Aug-91	Around 40 plants, south of mature birch. [Searched for but not re-found on 6 Jun 2019. Most of the vegetation is now too tall for it, due to lack of grazing].
Bransbury Common	SU418419	10-Aug-91	Around 40 plants. [Searched for but not re-found on 6 Jun 2019. Most of the vegetation is now too tall for it, due to lack of grazing].
Wigmore Heath	SU5862	19-May-11	SU58631 62356 Nominal grid ref SU5860 6230
Heath End	SU58646235	20-Apr-03	Among calluna
Wigmore Lane, Baughurst	SU586623	10-Aug-02	
Tadley Common	SU606622	29-Apr-09	23 plants on whole site, 1 at SU60639 62278, 1 at SU60655 62297, 3 at SU60664 62214, 2 at SU60664 62212, 1 at SU60664 62207, 5 at SU60689 62213.
Tadley Common	SU606623	29-Apr-09	23 plants on whole site, 4 at SU60656 62301.
Tadley Common (E)	SU606623	29-May-01	Several plants at SU6066 6231.
Tadley Common	SU607621	27-Apr-07	5 plants on damp heath at SU6074 6218.
Tadley Common	SU607622	29-Apr-09	23 plants on whole site, 1 at SU60725 62238, 1 at SU60720 62244.
Tadley Common	SU608622	29-Apr-09	23 plants on whole site, 3 at SU60854 62298.
Tadley Common	SU609622	29-Apr-09	23 plants on whole site, 1 at SU60967 62277.
Silchester Common (SSSI)	SU619622	11-May-18	One plant in flower at SU6191 6224. Searched hard but failed to find any more plants nearby.
Sherfield on Loddon	SU677580	03-Aug-04	Two plants 1.5m apart at SU6776 5801 in a remnant patch of heathland beside the green, but suffering from mowing.
Sherfield Village Green Chs	SU678579	20-Jun-05	HBIC records to 2009
Sherfield Village Green Chs	SU678580	14-Apr-93	HBIC records to 2009
A287 Hook Common, Hook	SU722532	14-May-00	Central reservation of A287. Good heathland community, unfortunately it is usually cut right back in May.
Bartley Heath (west side), Hook	SU7253	31-May-22	Plants were found in four hectares: two in SU 728 533, twelve in SU 728 534, one in SU 728 535, two in SU 729 533. Not all were in flower. Area was not exhaustively searched.
Bartley Heath (west side), Hook	SU7253	09-May-20	Plants were found in six hectares: SU 728 533, 728 534, 728 535, 729 533, 729 534 & 729 535. Most were photographed.
Bartley Heath (west side), Hook	SU7253	13-May-17	6 in SU 728 534, 1 in SU 728 535, 3 in SU 729 534. Plants had disappeared from many of the locations were they had been present in 2014.
Bartley Heath (west side), Hook	SU7253	18-May-14	6 in SU 728 533, 1 in SU 729 533, 21 in SU 728 534, 4 in SU 729 534, 3 in SU 728 535
Bartley Heath, Hook	SU727534	03-May-09	1 plant in this 100m square at SU7278 5345.

Website Threatened Plant records in VC12.xlsx

Bartley Heath, Hook	SU728533	03-May-09	4 plants in this 100m square. 1 at SU7284 5334, 1 at SU7288 5337, 1 at SU7284 5339 and 1 at SU7281 5339.
Bartley Heath	SU728533	26-Aug-06	plants at SU7288 5336, also SU7284 5344, SU7287 5347, SU7286 5346, SU7284 5344
Bartley Heath, Hook	SU728534	26-Aug-12	Two plants at SU72842 53440 and one at SU72865 53460.
Bartley Heath, Hook	SU728534	03-Sep-11	At SU7286 5348, SU7286 5346.
Bartley Heath, Hook	SU728534	03-May-09	19 plants in this 100m square. 1 at SU7282 5340, 2 at SU7287 5344, 1 at SU7285 5344, 2 at SU7286 5345, 3 at SU7283 5344, 1 at SU7285 5344, 3 at SU7284 5346, 1 at SU7286 5346, 1 at SU7287 5346, 1 at SU7287 5347, 1 at SU7288 5347, 1 at SU7289 5347 and 1 at SU7287 5348.
Bartley Heath	SU728534	04-May-08	18 plants in this 100m square. 2 at SU7287 5344, 2 at 7287 5346, 4 at 7287 5345, 1 at 7286 5345, 1 at 7286 5344, 1 at 7285 5345, 1 at 7284 5345, 3 at 7284 5344, 1 at 7289 5346, 1 at 7285 5348 and 1 at 7285 5340.
Bartley Heath	SU728534	28-Apr-07	One medium plant at SU7287 5344, one large plus one very small at SU7287 5346, three at SU7287 5345, one small at SU7286 5345, one medium at SU7286 5344, one large at SU7285 5345, one medium at SU7284 5345, one large and two small at SU7284 5344.
Bartley Heath	SU728534	26-Aug-06	plants at, SU7284 5344, also SU7287 5347, SU7286 5346, SU7284 5344, SU7288 5336
Bartley Heath, Hook	SU728535	03-May-09	5 plants in this 100m square. 1 at SU7289 5350, 3 at SU7286 5350, and 1 at SU7286 5354.
Bartley Heath, Hook	SU728535	04-May-08	8 plants within this 100m square. 2 at SU7282 5356, 2 at 7285 5353, 1 at 7287 5352, 1 at 7288 5351, 2 at 7285 5350.
Bartley Heath, Hook	SU728535	15-Sep-07	A second small plant found at SU7287 5352 where only one was seen on 28 April 2007.
Bartley Heath, Hook	SU728535	04-May-07	1 small plant at SU7283 5354 and one medium plant at 7282 5356.
Bartley Heath, Hook	SU728535	28-Apr-07	One small and one medium plant at SU7285 5353, one small at 7287 5352 and one small at SU7288 5351.
Bartley Heath, Hook	SU729534	16-Jul-13	Two small bushes at SU7295 5345.
Bartley Heath, Hook	SU729534	03-Sep-11	At SU7298 5343.
Bartley Heath, Hook	SU729534	09-May-10	One small flowering bush at SU72900 53479.
Bartley Heath, Hook	SU729534	03-May-09	1 plant in this 100m square at SU7294 5348.
Bartley Heath, Hook	SU729534	04-May-08	3 plants in this 100m square. 1 at SU7293 5347, 1 at 7297 5342, and 1 at 7298 5343.
Bartley Heath	SU729535	05-May-06	One heavily browsed shrub at SU7290 5350.
Bartley Heath (east side), Hook	SU731533	01-Sep-19	Multi-stemmed plant at SU 7312 5336
Bramshill Plantation	SU744627	06-May-10	A large sprawling shrub and a small shrub at SU7443 6278 beside Long Water.
Bramshill Common	SU744629	06-May-10	Two shrubs with single stems at SU7443 6296 and three senescent shrubs at SU7445 6295, all amongst Ulex minor.
Bramshill Common	SU746627	06-May-10	Four small shrubs at SU7462 6277 between Long Water and track.
Hazeley Heath	SU74725966	13-May-94	12 plants
Bramshill Common	SU751628	23-May-96	Two shrubs beside path.
Hazeley Heath	SU75425821	21-May-08	2 plants between this grid ref and SU7553 5818.
Hazeley Heath	SU75425821	20-May-94	52 plants between this grid ref and SU7553 5818.

Website Threatened Plant records in VC12.xlsx

Hazeley Heath	SU754582	16-May-13	One small shrub on the Mattingley Heath SU7541 5823, close to a recent turf scrape (Not done by Plantlife) and severe rutting caused during tree clearances. Decreased here.
Hazeley Heath	SU754582	21-May-08	Much decreased. One large sprawling shrub and one smaller one close by at SU7540 5824 on the north heath.
Odiham Common	SU755534	26-Jun-00	c.SU755534, pylon ride.
Bramshill Common	SU755623	06-May-10	Three small shrubs at SU7552 6239 on heathy margin of track, plus a large spreading shrub and a small shrub at SU7552 6237.
Bramshill Common	SU755624	06-May-10	One shrub at SU7552 6243 and four large shrubs at SU7552 6241, on heathy margin of track.
Bramshill Common	SU756615	09-May-97	Two shrubs beside the old road to Lower Common.
Bramshill Common	SU758625	06-May-10	One small and one larger shrub at SU7587 6253 on west side of a pond.
Bramshill Common, E side	SU760617	06-May-10	One old shrub with two sprawling stems at SU7606 6176 on wayleave, and one large senescent shrub at SU7607 6177 in rank heathland.
Hazeley Heath	SU761581	15-Aug-03	Three old shrubs amongst rank Molinia, two at SU7611 5813 and one at SU7611 5811.
Bramshill Common	SU761623	09-May-97	Six shrubs at SU761623½ on east side, near a pylon.
Bramshill Common	SU761624	06-May-10	One shrub with three stems at SU7610 6244 on wayleave.
Hazeley Heath, Hartley Wintney	SU762581	21-May-08	Greatly decreased. In open mire where burned in 2005, 3 small shrubs at SU7627 5811, 2 at SU7628 5811, one at SU7627 5811, SU7626 5812 and SU7626 5811.
Hazeley Heath	SU763580	07-May-15	One at SU76302 58086 in ungrazed control area. Also probably two plants a metre apart at SU76307 58093.
Hazeley Heath S, Hartley Wintney	SU763580	16-May-13	Senescent shrubs in flower at 7634 5807 (two, five metres apart), 7634 5806 and 7634 5801 (the largest).
Hazeley Heath S, Hartley Wintney	SU763580	21-May-08	Greatly decreased. SU7635 5803 (2 shrubs), SU7634 5806, SU7634 5808, SU7634 5809, all sprawling senescent shrubs in very rank heath dominated by large Ulex minor or Molinia.
Hazeley Heath	SU763581	07-May-15	One at SU76321 58110 and one at SU76320 58103 in ungrazed control area.
Hazeley Heath, Hartley Wintney	SU763582	07-May-15	One at SU76378 58203 in middle of one of the early scrapes.
Hazeley Heath	SU76385821	04-Aug-21	Two plants close together, north of the boardwalk. I detached at least ten of last year's brown seed pods from each plant but found them full of insect frass with a tiny hole bored in each pod. From c.20 pods a total of only two seeds were found (which were sown a metre or two away). This insect damage may explain why Petty whin is in steep decline. I was surprised that this year's seed pods are still green.
Hazeley Heath, Hartley Wintney	SU764579	01-Aug-03	Now very rare here and only seen as large, sprawling, senescent shrubs e.g. SU7646 5792.
Hazeley Heath	SU764580	07-May-15	One at SU76431 58056 in ungrazed control area.
Hazeley Heath, Hartley Wintney	SU764582	01-Aug-03	Now very rare here and only seen as large, sprawling, senescent shrubs e.g. SU7644 5820.
Eversley	SU767620	25-Apr-90	Two small shrubs near the children's play area at Eversley Lower Common c.SU767½620½, threatened by bramble invasion.
Lower Common	SU76786205	25-Apr-90	2 plants

Website Threatened Plant records in VC12.xlsx

Hogmoor Inclosure	SU78903480	23-Jul-93	HBIC records to 2009. [Searched for on 15 May 2019 but not re-found.]
West Minley	SU81235775	21-May-12	8 plants
West Minley	SU81235775	19-May-92	59 plants
West Minley Meadow	SU812577	21-May-12	Eight shrubs of various sizes at SU8121 5771, six with flowers but well-browsed.
Conford Moor	SU823330	10-Jul-98	[Searched for by Tony Mundell on 15 May 2019 but not re-found].
Wyndham's Pool, N of	SU823598	05-Jul-92	Several shrubs on wet heath.
Wyndhams	SU823598	03-Jul-92	2 plants
Ancells Farm	SU82505590	14-May-96	33 plants
Ancells Farm HWT reserve	SU82525596	18-May-08	1 plant in this 10m square, it had flowered.
Ancell's Farm	SU82535593	04-Aug-20	Despite much searching we could only find a single bush at SU82538 55933, though there were many dozens of bushes in this NW corner of the meadow on 18 May 2008.
Ancells Farm HWT reserve	SU82535595	18-May-08	1 plant in this 10m square, it had flowered.
Ancells Farm HWT reserve	SU82535597	18-May-08	2 plants in this 10m square, both had flowered.
Ancells Farm HWT reserve	SU82545593	18-May-08	3 plants in this 10m square, all had flowered.
Ancells Farm HWT reserve	SU82545594	18-May-08	4 plants in this 10m square, 1 had flowered, one very tiny.
Ancells Farm HWT reserve	SU82545596	18-May-08	3 plants in this 10m square, two very close together had flowered.
Ancells Farm HWT reserve	SU82545597	18-May-08	2 plants in this 10m square, they had flowered.
Ancells Farm HWT reserve	SU82545598	18-May-08	17 plants in this 10m square, 10 had flowered.
Ancells Farm HWT reserve	SU82545599	18-May-08	5 plants in this 10m square, all had flowered.
Ancells Farm	SU82555570	14-May-96	22 plants
Ancells Farm	SU82555580	14-May-96	38 plants
Ancells Farm	SU82555590	14-May-96	80 plants
Ancells Farm HWT reserve	SU82555593	18-May-08	1 plant in this 10m square, it had not flowered.
Ancells Farm HWT reserve	SU82555594	18-May-08	1 plant in this 10m square, it had flowered.
Ancells Farm HWT reserve	SU82555596	18-May-08	2 plants in this 10m square, they had flowered.
Ancells Farm HWT reserve	SU82555598	18-May-08	3 plants in this 10m square, all had flowered.
Ancells Farm HWT reserve	SU82555599	18-May-08	1 plant in this 10m square, it had flowered.
Ancells Meadow	SU825556	22-Mar-17	This plant I recorded a few years ago is doing well. There are three other plants in close proximity or perhaps they are layering from the parent plant?
Ancells Farm HWT reserve	SU825556	17-Sep-14	It is a quite large patch 1m across at SU82566 55689, probably (but difficult to decide this) of two intertwined plants.
Ancells Meadow	SU825557	21-May-12	Two small shrubs 3m apart at SU8252 5576 clearly from seed on a turf scrape. This is the first confirmed example I know of this species appearing on a turf scrape and maturing.
Ancells Farm HWT Reserve	SU825558	09-Jun-08	An additional site found at SU8255 5580.
Ancells Meadow	SU825559	04-Jun-09	Scattered plants, e.g. at SU82544 55983.
Ancells Meadow	SU825559	07-Jun-07	12 shrubs near north end at SU8255 5599.

Website Threatened Plant records in VC12.xlsx

Ancells Farm & Bramshot Fields	SU82565569	30-Jul-20	A patch 1m across at SU82565 55690.
Ancells Farm HWT reserve	SU82565596	18-May-08	2 plants in this 10m square, they had flowered.
Pyestock Heath	SU827540	12-May-11	Still three shrubs at SU8279 5409 near Gelvert Stream, but only a few sprawling stems amongst Ulex minor or overtopped by U. europaeus. The other sites at Pyestock Heath and Pondtail Heath were both burned in April 2011.
Pyestock Heath	SU827540	18-May-10	On bank near Gelvert Stream at SU8279 5409, now decreased to three shrubs and becoming smothered by Ulex minor and Ulex europaeus. One is a large shrub with sprawling stems, one moderate and one small. I walked north but found no others - much of the former habitat has become overgrown with gorse.
Pyestock Heath	SU827540	12-May-08	Seven large shrubs at SU8279 5409 to west of Gelvert Stream.
Pondtail	SU827541	21-May-12	Probably seven shrubs along several metres of bank at SU8278 5409 / SU8279 5410, but mainly senescent with long sprawling stems which took something of a battering from last winter's grazing.
Crookham Bog	SU82775252	17-May-92	1 plant
Pondtail Road	SU82795412	25-May-94	3 plants
Crookham Common	SU82815289	18-May-92	11 plants
Crookham Common	SU82835302	05-Sep-94	Several plants. Destroyed by pipe-laying in 1995.
Pondtail Heath, Fleet	SU828534	02-May-04	SU82895346, 82875346. 2 old shrubs at E end of Pondtail Heath.
Pondtail Heath	SU828540	16-May-16	Senescent shrubs, seven stems located (five with flowers) SU8280 5407.
Pondtail Heath	SU828540	19-Jun-00	Six shrubs on bank near the Gelvert Stream, becoming overgrown with scrub.
Pyestock Heath, Pondtail	SU828541	07-May-98	6 shrubs on heath at Pondtail Road, Fleet. This is only a third of the number present in 1984.
Crookham Bog	SU82865241	17-May-92	2 plants
Pondtail Heath	SU82875346	14-May-08	1 plant
Pondtail Heath	SU82875346	30-May-06	1 plant
Pondtail Heath	SU82905345	11-May-98	5 plants
Pondtail Heath	SU82905345	21-May-93	3 plants
Pondtail Heath	SU829537	16-May-16	One shrub has survived the fires of 2010 and 2011 at SU8296 5379.
Pyestock Heath	SU829537	18-May-10	In open area below Pyestock Hill. Site recently burned apart from NW corner where one shrub survives at SU8294 5379. I doubt the others will recover as all were senescent and struggling amongst rank Molinia/Calluna/Ulex minor.
Pyestock Heath	SU829537	12-May-08	Five leggy shrubs in rank Calluna/Molinia/Ulex minor heathland to east of Gelvert Stream at SU8296 5379, SU8296 5377, SU8295 5379 and SU8293 5377.
nr Pyestock Hill, Pondtail	SU829538	07-May-98	7 shrubs on heath below Pyestock Hill 7 & 10 May. (c.50 shrubs here in 1984).
Bourley	SU830508	19-May-15	One shrub on mown heath near track to ponds, SU8307 5089.
Foxlease Meadows	SU831568	13-May-08	Apparently rare, and much decreased. the few shrubs located were hard browsed with few flowers. One small shrub at SU8315 5685 and a leggy shrub at SU8313 5683 with much browsing damage. The current grazing regime here is possibly rather harsh. Some locations where Genista grew 25 years ago have become birch woodland.
Long Valley	SU833525	15-May-15	Five shrubs, heath NW of Long Valley SU8335 5258, 8334 5259, 8333 5259.

Website Threatened Plant records in VC12.xlsx

Foxlease Meadows	SU833568	12-Feb-09	Three shrubs towards the eastern end of the meadows at SU8331 5683.
Bohunt, Liphook	SU836305	10-May-98	Golf course, single plant in Calluna. [Searched for on 15 May 2019 but not re-found though there are still patches of Calluna here].
Yateley Common East	SU83725984	07-Jul-95	2 plants
Steep Bottom	SU840506	16-Jun-14	Large senescent shrub with seven stems in mire, SU8408 5063.
Claycart Hill, Aldershot	SU853525	01-Jan-90	One plant.

I have omitted Eelmoor as well studied and Farnborough Airfield as difficult access.

I have omitted some earlier records, or duplicates, with the same grid reference.

Comparing with earlier records (many of which I have deleted from here) it is clear that this species is in serious decline. Many losses were due to heath fires.
